

## Domtek's Perforated Accoustical Panels create a quiet and more controlled environment.

As sound waves hit the panel, that noise dissipates through the perforations instead of rebounding back into the environment. Perforated Panels are made from 28-gauge hi-tensile steel and come with a 40-year warranty protecting your investment for a lifetime.

Available in 36" wide profiles, Domtek's Perforated Panels are custom cut to length for quick install. With a variety of colors to choose from, you can now color match the perforated panel to your metal building.
